McPhillamys job and career opportunities

Whether you're trained or untrained, a university graduate or a tradie, the McPhillamys Gold Project will provide great career opportunities for local people.

'Locals first'

An important feature of the McPhillamys Project is the Regis 'locals first' policy.

The aim of this policy is to ensure that local people enjoy the benefits of the project.

We won't have a Fly In, Fly Out workforce.

Working with local training providers

We've also met with job and training organisations and will continue to look at partnering opportunities with Skillset, TAFE and other providers.

As the project continues through the final stages of the assessment process, the Regis team is working on plans and policies for the construction phase, in preparation for a possible approval.

Regis wants to be ready to start construction without delay, if the project is approved.

If you'd like to know more about the McPhillamys Gold Project, don't hesitate to get in touch.
