Meeting with our Community

Our regular get-together with Council and community representatives took place at the Blayney Community Centre this week, covering a range of issues relevant to the McPhillamys Gold Project.

The McPhillamys Community Consultative Committee enables our neighbours and other stakeholders to be involved in the project, provide input and ask questions of Regis.

This week's meeting included discussion about water, negotiated agreements, the timing of the assessment and minute-taking. The presentation and minutes will be available on the project website in the next fortnight.

For more information please go to:
www.mcphillamys.com.au

Supporting the Challenge

Regis was pleased to support the Blayney Rotary Club in its annual sponsorship of the Science and Engineering Challenge, held on Monday at St Stanislaus School in Bathurst.

The Challenge is part of a national program for high school students which promotes participation and careers in science and engineering subjects.

Regis Resources' acquisition

Regis Resources has purchased a 30% interest in Tropicana, a top 5 Australian producing gold mine, in WA.

The acquisition diversifies Regis' existing production base with a non-operated interest in a high quality, low cost, high-margin gold asset. This joint venture with AngloGold Ashanti will deliver a well-established asset to the Regis portfolio, with an expected mine life of 10+ years.
