

McPhillamys Gold Project

Let's create local job, training and business opportunities.

One of the great benefits of the McPhillamys Gold Project is the boost it will provide for the local community. This includes, on average:

- 480 jobs during the construction of the mine
- 120 jobs during construction of the proposed pipeline
- 260 jobs per year in mining operations.

And our 'locals first' employment policy will mean lots of great opportunities for people from the local area.

A boost for Blayney

With extra people and activity, local businesses will also receive a boost. The mine and its workers will create demand for all kinds of goods and services.

For more information about the project, the opportunities and how you can show your support, please get in touch.

- Drop in to the Regis office, 57 Adelaide Street, Blayney
