

## Local job opportunities.

One of the great benefits of the McPhillamys Gold Project is the boost it will give the local community — including jobs, training and apprenticeship opportunities. This includes, on average:

- 480 jobs during the construction of the mine
- 120 jobs during construction of the proposed pipeline
- 260 jobs per year in mining operations.

## Part-time/job-share roles and flexible hours

There has been strong interest in new approaches including possible part-time shifts.

These part-time/job-share roles would be ideal for farmers and other locals looking to supplement their income without having to take on a full-time role.

## Local business opportunities.

McPhillamys will also provide a big economic boost to local businesses. Many existing businesses will see a big increase in demand for their goods and services, as we have seen when other mines came to the area. There will also be opportunities for new businesses, to service the mine and the people who work there.

**If you'd like to be added to our job or business register, or find out more about the potential opportunities, please get in touch.**
