Environmental Management Plans at McPhillamys

The McPhillamys Gold Project will have 18 separate Environmental Management Plans. These plans are the baseline for best practice environmental performance during construction and operations.

The plans include:

- o water
- o biodiversity
- o noise and blast
- o air quality and greenhouse gas
- o heritage
- o traffic
- o rehabilitation and
- o social impact.

Importantly, the plans will be subject to regular audits and reviews throughout the life of the mine, to make sure they are achieving their objectives and complying with relevant standards and legislation.

When completed, the plans will be available on our website, along with a range of other project documents.

For more information and project documentation go to: <https://www.ipcn.nsw.gov.au/cases/2022/11/mcphillamys-gold-project>

Millthorpe Fire Fair

Regis is pleased to be supporting this year's Millthorpe Fire Fair, coming up next Friday night.

There'll be live music, stalls, shopping, fireworks and great local food and wine. Rug up and come along for a fun night out!

Regards,
