### Let's get ready for fire season

With the days getting warmer the threat of fires is never far away at this time of year. And the best time to prepare for bushfires or grass fires is well before you need to.

If you haven't already, right now is a good time to prepare or review your fire plan.

The NSW Rural Fire Service has a useful website called [myfireplan.com.au](http://myfireplan.com.au), which can help you prepare a fire plan or check your existing one.

Finally, a reminder that permits are required for any fires during the summer months (officially the danger period runs from 1 October—31 March). These can be obtained from your local RFS brigade.
