

McPhillamys Gold Project

Project Update

Kath Logan

Manager

Community Consultative Committee (CCC)

The final CCC meeting for 2023 was held last week, giving local residents and Councils the opportunity to hear updates

about McPhillamys and provide feedback to the Regis team.

We also acknowledged the contribution of Peter Hildenbeutel who has resigned from the CCC after representing the Blayney community since the committee was formed in 2018.

Peter's wide local network allowed him to raise issues that were important to people across the Blayney LGA.

Regis recognises Peter's contribution to the CCC and wishes him all the best with the travelling he has planned.

Belubula River habitat

Protecting local waterways is an important focus for the McPhillamys Project.

Regis has been studying and surveying the Belubula River for a number of years, collecting baseline information

prior to mining operations commencing.

This includes additional monitoring over the past month, measuring aquatic life in the Belubula.

For more information on any aspect of the project please get in touch with our Blayney office.

Regards,
Kath Logan
