## Investing in our Community

Applications are open for our June 2024 Community Investment round.

With grants up to \$1000, we will be funding projects in the focus areas of environment, agriculture, education, health, tourism, community development and sports.

For applications and eligibility guidelines contact us via email on [nsw\\_enquiries@regisresources.com](mailto:nsw_enquiries@regisresources.com)

## NSW Mining Careers Dinner

Last Wednesday, Environmental Advisor Josh Manns presented at the NSW Minerals Council Careers Dinner in Orange which was attended by 150 students, careers advisors and parents.

After completing a degree in environmental science, Josh was accepted into Glencore's graduate program which took him to Mt Isa. Josh spoke about how working in the extensive zinc operation was a great

opportunity to build on his knowledge of the Australian mining industry. It's rare for a graduate to secure a position at a site that gives them full exposure to exploration, mining, processing and rehabilitation aspects of the mining industry.

Working in northwest Queensland gave Josh opportunities to travel remote parts of Queensland that he would never otherwise have seen, complete postgraduate study and learn from experienced operators.

Deciding he wanted to be closer to home, Josh took a position with Regis. His key tasks are baseline environmental monitoring, installation of monitoring equipment, preparing documentation, and supporting the establishment of an environmental management system.

His advice to students considering a career in mining was to take advantage of opportunities, embrace challenges and enjoy the quality of life that goes with a career in mining.
